

## Green Gold Label Program

### Introduction

This document includes a list of all endorsed schemes by Green Gold Label (GGL). Endorsed schemes can be used by GGL participants within the GGL scheme as stipulated in GGL standard 1 (COC criteria). This list may be updated if schemes are added or removed.

As GGL aims at meeting national regulatory requirements some schemes might only partially meet national (sustainability) requirements and therefore this is also specified in this list. In those cases limitations or conditions are added to the list below and shall be considered by a Participant when sourcing material covered by such a scheme.
